ABOUT ME

Curiosity-driven final year Electronics and Communication Engineering student with a passion for building intelligent and efficient systems. Strong foundation in core electronics, communication, and embedded technologies.

EDUCATION

- Bachelor of Engineering in Electronics and Communication Engineering
  PGP College of Engineering and Technology - Namakkal,
  Expected graduation: 2027 (2023 - 2027) | CGPA: 8.3
- Higher Secondary Education
  Government Girls Higher Secondary School, Aranthangi, Pudukkottai - 614616.
  Year of Completion : 2023 | Cumulative Percentage: 79

TECHNICAL SKILLS

PROGRAMMING	Python, C/C++, HTML, CSS
EMBEDDED SYSTEMS	ESP32, Arduino, NodeMCU, Raspberry Pi, Keil µVision, Xilinx
TOOLS & PLATFORMS	Wokwi, Blynk, ThingSpeak, MATLAB, LTspice, Visual Studio Code, Microsoft Excel, Tinkercad
CORE AREAS	Basic Electronics, Communication Systems, Embedded Technologies, IoT

PROJECTS

- **IOT BASED WATER TANK LEVEL MONITORING SYSTEM**
  project tools : esp32, ultrasonic sensor, blynk iot app
  To monitor water tank levels in real time and prevent water overflow using IoT technology.
- **ESP32 BASED ANIMAL INTRUSIONS ALERT FOR FARMS**
  project tools : ESP32, PIR Sensor, Arduino IDE
  To detect animal intrusion in farms and alert farmers to protect crops from damage
- **AI BASED AGRICULTURE MONITORING AND IRRIGATION SYSTEM**
  project tools : ESP32, Soil Moisture Sensor, DHT11 , Arduino IDE.
  To monitor agricultural conditions and automate irrigation using AI and sensors to improve water efficiency and crop growth.

- **AI BASED PCB FAULT DETECTION**

project tools : Google Colab, TensorFlow, MobileNetV2, Grad-CAM
To detect PCB defects from images using AI-based image classification.

TRAINEESHIP

- **VIKRAM SOLAR PVT LTD, SRIPERUMBUDUR | JUN 2026**
  Gained practical knowledge of Solar PV technology, solar panel operation, and renewable energy systems - 30 days
- **IMBED SOFTWARE, KARAIKUDI |DEC 2025**
  Learned IoT fundamentals, sensor interfacing, and basic real-time monitoring applications - 20 days
- **CALIBER EMBEDDED TECHNOLOGIES, SALEM | JUL 2025**
  Gained exposure to embedded systems, microcontrollers, and hardware-software integration - 15 days
- **RIVERAA TECHNOLOGIES, TRICHY | DEC 2024**
  Learned computer fundamentals, operating system concepts, and basic system troubleshooting - 10 days

CERTIFICATIONS

- **ROBOTICS TRAINING – GALWIN TECHNOLOGIES:**
  Gained basic knowledge of robotics concepts and applications.
- **OPERATING SYSTEM BASICS – CISCO NETWORKING ACADEMY:**
  Learned fundamental operating system concepts and functions.
- **WEB DEVELOPMENT – CODEBIND TECHNOLOGIES:**
  Learned the basics of HTML and CSS for webpage design.

ACHIEVEMENTS & ACTIVITIES

- **24HOURS HACKATHON**
  Participated in developing a real-time IoT-based solution.
- **TECH PAPER PRESENTATION**
  Secured Second Prize for presenting a technical concept.
- **QUIZ COORDINATOR**
  Coordinated quiz activities and supported event management.

STRENGTH

- Quick learner
- Teamwork
- Adaptability
- Leadership
- problem solving skills
